

4.3 Database Schema Documentation — CampusCare

Overview

CampusCare uses PostgreSQL hosted on Supabase, managed through the Prisma ORM (v6). The schema consists of 6 tables representing users, roles, issues, photos, comments, and notifications.

Relationships Summary

- User → UserRole: One-to-Many via UserRole.userId
- User → Issue (reporter): One-to-Many via Issue.reporterId
- User → Issue (assignee): One-to-Many via Issue.assigneeId
- User → Comment: One-to-Many via Comment.authorId
- User → IssuePhoto: One-to-Many via IssuePhoto.uploadedBy
- User → Notification: One-to-Many via Notification.userId
- Issue → IssuePhoto: One-to-Many via IssuePhoto.issueId
- Issue → Comment: One-to-Many via Comment.issueId
- Issue → Notification: One-to-Many via Notification.issueId

Cascade Rules

All foreign key relationships use CASCADE on delete. Deleting a User cascades to their roles, issues, comments, photos, and notifications. Deleting an Issue cascades to its photos, comments, and notifications.
